MANI SANKAR VASA

Software Engineer | Java

• +91 8247481116 • manisankar0911@gmail.com • https://www.linkedin.com/in/mani-shankar-vasa-a71198186/

PROFESSIONAL SUMMARY

Java Software Engineer with 2 years of experience developing and enhancing enterprise applications using Java, Spring Boot, RESTful APIs, and SQL. Experienced in backend feature development, API integration, authentication, database optimization, and production debugging. Hands-on experience with JPA/Hibernate, PostgreSQL, MySQL, Microservices, Docker with a focus on building secure, scalable, and maintainable backend services.

TECHNICAL SKILLS

Programming: Java, SQL

Backend: Spring Boot, JPA/Hibernate, REST API, Postman

Database: PostgreSQL, MySQL

DevOps: Docker, Git, CI/CD

Concepts: OOP, Design Patterns, Multithreading & Concurrency, Agile, Data Structures

AI Tools: GitHub Copilot, Codex

PROFESSIONAL EXPERIENCE

Software Engineer | Cognizant Technology Solutions **Oct 2024 – Present**

Chennai, Tamil Nadu

- Developed and enhanced enterprise applications using Java and Spring Boot, implementing new features, modifying existing functionality and resolving production defects.
- Implemented authentication enhancements, validation, role-based functionality and error handling, improving the reliability and consistency of application workflows.
- Analyzed and debugged application issues across Java/Spring Boot, application logs and database layers, performing root-cause analysis and implementing fixes.
- Developed and maintained REST APIs and technical documentation for 30+ APIs, supporting application maintenance and consistent integration practices.
- Optimized SQL queries and database operations, including indexing for large datasets, reducing API response time by 60% in a live production environment.
- Collaborated with cross-functional teams to understand business requirements, troubleshoot issues and deliver application changes through an Agile development process.
- Followed Git-based development workflows, including code commits, peer reviews, and build verification, while collaborating within an Agile team.

PROJECT

Dev Challenges — Java, Spring Boot, REST API, PostgreSQL, JWT - *Developer Learning & Progress Tracking Platform*

- Developed a full-stack platform to document software development challenges, troubleshooting attempts, solutions, and technical learnings.
- Built REST APIs using Java and Spring Boot, with PostgreSQL and JPA/Hibernate for data persistence and entity management.
- Implemented JWT-based authentication using Spring Security and BCrypt password hashing to secure user accounts and authenticated API requests.
- Developed responsive ReactJS interfaces for user profiles and challenge management, enabling developers to document and showcase their problem-solving experiences.

EDUCATION

B.Tech in Mechanical Engineering **Graduated: Mar 2024**

Vishnu Institute of Technology (Autonomous), Andhra Pradesh, India *— Self-taught software engineer; transitioned from Mechanical Engineering through independent study and real-world project development.*

Leadership: Organized and led a Web Development Hackathon; received formal recognition for coordination and execution.
